6 How to insert figures

This is a brief explanation of how to insert figures. You can specify the position of the figure by [htbp]. If you are writing a diagram at the same time as shown in the example, the figure is inserted in order of h: its location, t: top of the page, b: bottom of the page, p: a separate page

You can specify an image file "pic.pdf" in the same directory by writing `\includegraphics[width=5cm,clip]{pic.pdf}`. You can specify the size of the image file with the option "pic.pdf".

You can refer to the figure by writing `\figref{Label}`. (e.g., Figure1).
